

WALL STICKERS INSTALLATION

For the installation you will need:
a painting tape and a squeegee.

Step 1

The Decal consist of the back paper,
the sticker and the semi-transparent top layer.

Step 2

Before the application, lay your Decal
on a flat surface and press
the vinyl sheet with the plastic squeegee.

Step 3

Position your vinyl sheet on the wall,
centering the sticker
and securing it with masking
or painting tape.
(The tape acts as a hinge
for the project.)
You can see the image through its
semi-transparent top layer.

Step 4

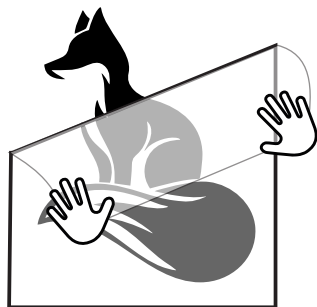

Flip the vinyl sheet upward and slowly peel off the bottom layer. Let the vinyl
rest on the semi-transparent top layer. (If the decal wants
to stick to the backing, slowly manipulate the backing
to help the decal stick to the top layer.)

Use a plastic squeegee over the semi-transparent top layer to
secure the decal to your wall. Work from the center
out on both sides over the decal.

Βήμα 5

Then, carefully peel off
the sticky top layer in 180° to
reveal your decal.

Βήμα 6

Your Decal is ready!
